PROFESSIONAL SUMMARY

Motivated AI/ML Engineer and M.Sc. Artificial Intelligence candidate with hands-on experience building machine learning solutions for real-world problems. Proficient in Python, TensorFlow, PyTorch, and scikit-learn, with project experience in healthcare risk prediction and agricultural recommendation systems. Passionate about developing intelligent, data-driven products that create meaningful impact.

INTERNSHIP EXPERIENCE

Full Stack Web Developer Intern | HodoLabs

2026 – Present

- Collaborate with the development team to implement features, resolve issues, and improve application usability.
- Work with databases, CRUD operations, debugging, testing, API integration, and deployment.
- Build responsive web interfaces and implement server-side functionality based on project requirements.
- Develop and maintain full-stack web applications across front-end and back-end components on live client projects.

PROJECTS

Maternal Health Risk Prediction System

Machine Learning | Healthcare | Classification

- Designed and developed an ML-based system to predict risk levels of pregnant women during delivery using maternal health parameters such as blood pressure, glucose levels, and heart rate.
- Applied classification algorithms to identify high, medium, and low risk categories, enabling early intervention for healthcare professionals.
- Evaluated model performance using accuracy, precision, recall, and F1-score metrics.

Crop Recommendation System

Machine Learning | Agriculture | Data Science

- Built an ML-powered crop recommendation engine that suggests optimal crops based on soil nutrients (N, P, K), temperature, humidity, pH, and rainfall data.
- Applied supervised learning models including Random Forest and Decision Trees, achieving high prediction accuracy across multiple crop classes.
- Demonstrated potential for practical deployment in smart farming and agri-tech applications.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, HTML

ML / DL Frameworks: TensorFlow, PyTorch, scikit-learn, Neural Networks, Deep Learning

Data & Analysis: Exploratory Data Analysis (EDA), Statistical Modelling with R

Tools & Platforms: Jupyter Notebook, Google Colab, Git

EDUCATION

M.Sc. Artificial Intelligence

St. Joseph's College (Autonomous), Trichy

Expected 2027

B.Sc. Computer Science

Srimad Andavan Arts & Science College

2022 – 2025

CERTIFICATIONS & COURSES

Mastering Statistics using R • AI/ML for Geodata Analysis • Introduction to Neural Networks and Learning (ISRO) • Introduction to Deep Learning • ChatGPT for Beginners • Exploring Earth's Moon through Chandrayaan (ISRO) • Basics of Exploratory Data Analysis • Online Courses: Great Learning, NPTEL

EXTRACURRICULAR ACTIVITIES

- Nature Photography — developed a keen eye for detail, patience, and creative visual storytelling.
